

Bicyclist Left Turn In Front Of Traffic

Frequency: 130 cases; 4.3% of all crashes
Severity: 28% resulted in serious and fatal injuries

Description: The bicyclist made a left turn in front of traffic traveling in the same direction.

Summary: In comparison to all crashes, this crash was more likely to involve youth (age 10 to 14) bicyclists and occur on high-speed, 2-lane roads.

Slightly more than 60 percent of these events took place at a midblock location which had no special feature.

These crashes tended to be more severe than the average.
