

Motorist Overtaking— Bicyclist Path Obstructed

Frequency: 5 cases; 0.2% of all crashes
Severity: None resulted in serious or fatal injuries

Description: The motorist was overtaking a bicyclist whose path was obstructed. The bicyclist struck the obstruction or overtaking motorist.

Summary: For the few (n=5) crashes of this type, four took place under daylight conditions, and one was on a road with a speed limit of 80+ km/h.

None of these crashes resulted in serious or fatal injuries.
